Marvelous Achievement of Packard Engineering The "FUELIZER"

This Exclusive Packard Teature now Standard Equipment on every new Packard Car

VITH the development of the Fuelizer, the engineers of the Packard Company have reached the goal for which motor car interests all over the world have been striving for many years.

In short—they have achieved perfect combustion of all grades of gasoline.

To the Packard owner, at least, the inefficient carburetion of gasoline is no longer a source of worry and expense.

Quick starting—with a temperature of 11° above Zero, the Packard engine equipped with Fuelizer responds perfectly to the throttle in 10 seconds.

About 20 seconds after starting the engine may be operated perfectly on a normal mixture - no need of choking

Brooklyn: Flatbush and 8th Avenues

Poughkeepsie: 239 Main Street

Long Island City: Queens Boulevard at Hill St.

White Plains: Mamaroneck at Martine Avenue

Tests made at 5° below Zero show that the engine is able to pull on high gear almost immediately.

Freedom from carbon-not one single case of foul spark plugs or valves, combustion chamber walls or piston rings, developed in the months of testing after the perfection of the Fuelizer.

Complete combustion of fuel is shown by the absence of oil dilution in the crank case. The Fuelizer does away with this main cause of wear on engine bearings and scoring of cylinder walls. It does away with sticky valve guides and valve stems.

Freedom from smoking was demonstrated by the clean exhaust, due primarily to the fact that the Fuelizer works at the maximum when engine is starting and idling.

The Fuelizer is about the simplest invention anybody ever saw to mean so much.

It consists essentially of a pipe, a chamber and a spark plug. It weighs less than two pounds.

It is automatically regulated by the varying degree of suction exerted by the engine as the throttle is opened or closed. Not a moving part - not an adjustment anywhere.

A Packard feature. Exclusively Packard.

In every way an achievement that must strengthen the appeal of the Packard Car to the practical-minded man who is looking for passenger transportation on the basis of performance, economy and value.
